Dear Hiring Manager,

My Name Is Liam Buckman, and I am currently pursuing a degree in mechanical engineering at the University of Waterloo. I am an eager individual looking to gain experience in the many fields that are available as an engineer, specifically in the aerospace, automotive, and energy industry.

During my time at Waterloo, I have had the pleasure of working on in-class projects and being part of the University of Waterloo Formula Electric design team. Through these experiences I have had the opportunity to gain practical experience working alongside colleagues to complete complex tasks before deadlines. Before my time at Waterloo, I worked as a customer service and lumber representative at a retail building center, selling and quoting material for professional contractors. During this time, I also helped customers with a wide range of home maintenance problems, practicing my problem solving and analytical skills.

I have also had the opportunity to be vice-president of my community's environmental sustainability group. During this time, I helped to coordinate community cleanups, collaborated with the municipal government to overlook the county's sustainability plan, and appeared in a documentary that aired world-wide called Plastic People. I believe that as an aspiring engineer, I have a responsibility to contribute to creating and maintaining sustainable practices for the future, and my experience facilitating growth in this area is an asset.

Through my experiences I have gained a wide range of soft and hard skills that I believe would allow me to contribute effectively to your team. However, I believe my strongest quality is my eagerness to learn and continuously improve my skillset as an engineer. Thank you for taking the time and consideration to look through my application package. I look forward to hearing from you, if you have any questions, please reach out to me via the email and phone number provided above.

Sincerely,

Liam Buckman
